Collective Learning for Transformational Change Valerie A. Brown, Judith A. Lambert, 2013 The drive for change has informed human endeavour throughout history From fields to factories to offices people have always asked how to make things better This innovative book offers a step by step guide for recognising the need for transformational change and kick starting a course of implementation that leads to the creation of a productive just and sustainable future for the given community Drawing on over 300 cases of transformational change planned for and supported through the process of collective learning the book shows how a collective learning model based on open learning among diverse interests can improve communication and achieve lasting system change Part one of the book outlines the theory and practice of collective learning drawing on the experiential learning cycle developed by David Kolb The practice follows the rules of open space learning dialogue and valuing diversity and is flexible allowing adaptation to different situations Case studies in Part two provide examples of collective learning leading to transformational change in a wide range of contexts from cities to councils to organisations Part three offers thirty three activities on which the programme designers can draw in the course of guiding transformational change from team building to community development monitoring evaluation and cross cultural learning This guidebook differs from the traditional management of change Not only does the process begin with sharing ideals only later proceeding to implementation but it also actively harnesses the full set of interests in planning direct action seeking constructive collaboration not consensus This groundbreaking guidebook is designed to be fun accessible and engaging for both students and professionals in the fields of administration and governance

Breaking Down Barriers Pat Langdon, Jonathan Lazar, Ann Heylighen, Hua Dong, 2018-02-19 The Cambridge Workshops on Universal Access and Assistive Technology CWUAAT is one of the few gatherings where people interested in inclusive design across different fields including designers computer scientists engineers architects ergonomists ethnographers policymakers and user communities meet discuss and collaborate CWUAAT has also become an international workshop representing diverse cultures including Portugal Germany Trinidad and Tobago Canada Australia China Norway USA Belgium UK and many more The workshop has five main themes based on barriers identified in the developing field of design for inclusion I Breaking Down Barriers between Disciplines II Breaking Down Barriers between Users Designers and Developers III Removing Barriers to Usability Accessibility and Inclusive Design IV Breaking Down Barriers between People with Impairments and Those without V Breaking Down Barriers between Research and Policy making In the context of developing demographic changes leading to greater numbers of older people and people living with impairments the general field of inclusive design research strives to relate the capabilities of the population to the design of products services and spaces CWUAAT has always had a successful multidisciplinary focus but if genuine transdisciplinary fields are to evolve from this the final barriers to integrated research must be identified and characterised Only then will benefits be realised in an inclusive society Barriers do not arise from impairments themselves

but instead are erected by humans who often have not considered a greater variation in sensory cognitive and physical user capabilities Barriers are not only technical or architectural but they also exist between different communities of professionals Our continual goal with the CWUAAT workshop series is to break down barriers in technical physical and architectural design as well as barriers between different professional communities
